

Botox/Xeomin Injections

Now Offered at The Cabin!

Dr. Mingos & Associates • 816-531-8740 • drmingos.com

Did you know dentists are some of the most reliable medical professionals to administer Botox?

Dentists may be known for their work with teeth but they are experts in facial muscles too. They specialize in the head, jaw AND smile, making them uniquely qualified to provide this sort of procedure. Even though the treatment includes the paralysis of muscles, dentists around the world administer Botox (and other FDA approved neuromodulators like Xeomin) in a low-risk procedure that involves injections of small doses. These doses are administered using needles and relax the muscles where they are injected. Dentists have extensive experience in handling needles from their dental school education and day-to-day patient care.

Several of our dentists – listed to the right – are certified and qualified to offer facial Botox for medical or cosmetic purposes here at The Cabin.

Over 3.6 million people in the US received Botox treatments yearly. 79% of Americans know about Botox or have undergone this treatment. It is the hottest product in the world of non-surgical cosmetics.

How these products can help you

We offer two products - Botox and Xeomin. Both involve minimally invasive injections that freeze muscles, which can provide relief from physical issues and also stop creases/wrinkles caused by facial expressions.

These products can help with: TMJ, Grinding Teeth Syndrome, gummy smile correction, lazy eye adjustment, chronic migraine reduction, eye twitching recession, neck spasm slowdown and much more.

Botox & Xeomin can also make you look younger by:

Getting rid of fine lines & wrinkles

Minimizing Crow's Feet Around Eyes

Erasing lines from between

Eliminating horizontal lines across forehead

Wiping away worry lines around mouth

Getting rid of lines on the neck

Unique benefit	Tried and true: the first and most frequently used. Contains additives (complex proteins). Leading treatment in the U.S.	Contains no additives, which may be better for sensitive skin

How Much Botox or Xeomin will I need?

Can I get Botox or Xeomin injections when I come in from my semi-annual teeth cleaning appointments?

Yes! This can be a stand alone service OR an add on to your semi-annual teeth cleaning or your cosmetic dentistry treatment. We are here to help you feel more confident about your smile and appearance!

How much will one session cost?

Cost will vary per person. Typically between 20 -50 units are injected per appointment. Each part of your head and neck require a different number of injections to make an impact. The graphic to the left showcases some of these areas. After you discuss your areas of interest with the doctor, he or she will need your approval for treatment cost prior to injections.

Can I use my HSA, FSA for Botox/Xeomin injections? Does insurance cover them?

These types of injections are not eligible for HSA/ FSA spending. Dental insurance does not cover Botox or Xeomin (for cosmetic purposes or for TMJ or migraines).

Who Should NOT Get Botox?

People who are pregnant, breastfeeding or have a neurological disease shouldn't use these types of injections. You shouldn't have Botox shots if you're allergic to cow's milk protein or have a history of egg allergies. Please be sure to share all of your medical conditions with your dentist prior to receiving any treatment. Please note: Xeomin and Botox don't work for *all* types wrinkles.

“We are always working to meet the needs of our patients. This new service is a testament to our talented staff and its dedication to help patients feel their best.”
